Response to Arguments

- 1. Applicant's arguments filled on August 24, 2004 have been fully considered, however they are not persuasive because of the following reasons:
- 2. Applicants argue that Peterson does not teach a filter that filters applications. In response to Applicant's argument, the Patent Office maintain the rejection because Peterson does teach filtering said application from said plurality of applications as shown in column 5, lines 35-50, col.6, lines 32-55, and col.8, lines 20-30. Clearly shows a filter that filters applications.
- 3. Applicants argue that Peterson does not teach or suggest the server filter object blocking a server application. In response to Applicant's argument, the Patent Office maintain the rejection because Peterson does teach or suggest the server filter object blocking a server application as shown in col.5, lines 15-32. Clearly shows blocking a server application by the server filter object.
 - 4. Accordingly, claims 20-39 are respectfully rejected.
